

## One free Cloud Academy license for your school. Valid for 3 months.

### Transform your technical capability with QA's Cloud Academy

You can become your school's computer science champion. With access to over 780 self-paced training courses, the platform has been designed and organised to help you build real-world tech and cyber skills.

#### The Cyber Security Training Library

To develop your cyber security skills, we've created a special learning path where you can find an excellent series of training materials to develop your understanding of how to protect, secure, prevent, and identify weaknesses, threats, and risks, while adhering to cloud governance and compliance programs.

These provide a useful foundation for you to build upon and later expand into ethical hacking learning paths or even take the next step into a certified qualification.

#### Are there alternative learning paths?

If you would like to use your free license for a more non-technical route, then Cloud Academy also provides access to a Business Management study category.

You can study for a range of certifications from management frameworks from DevOps and Agile, Project Management (Prince2) and ITIL, Scrum.

#### Drop in sessions

Our Cloud Academy expert, Ian, will be joining us for drop-in sessions on the 15th/16th March to answer any questions and take you through a live demo of the Cloud Academy website.

### → Activate your license

Please get in touch with Kristen Bingle at [hello@cyberexplorers.co.uk](mailto:hello@cyberexplorers.co.uk) to activate your license. Kristen will register you onto the platform and help get you started.
